Pool Checkers Puzzles
by Asgat Ayupov (1940-1996)
Asbest, Tatarstan

Jake Kacher, 2015

This book is a work of art - Draughts Art.
It contains 130 draughts compositions created by a talented Russian composer Asgat Ayupov.
Russian checkers is similar to draughts, the selected puzzles work same in both games.

Each puzzle is presented by a diagram and a detailed solution.
The key to understand the moves in the solutions is the universal notation that uses chess board letters and numbers used both in Russian and Pool Checkers.
Each square is located at the intersection of a column and a row, the bottom left corner is named "a1" for it is at the intersection of column A and row 1.
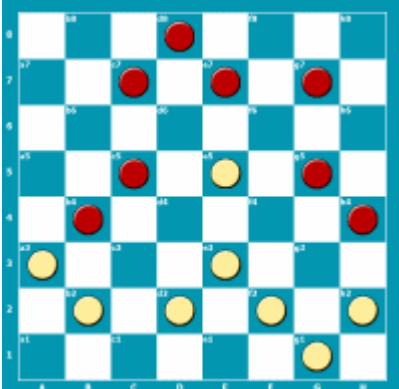

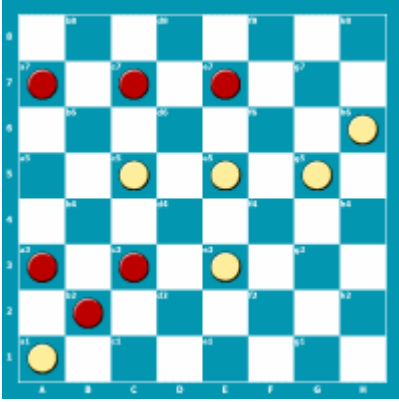

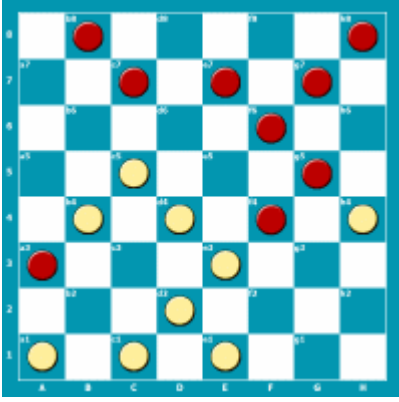

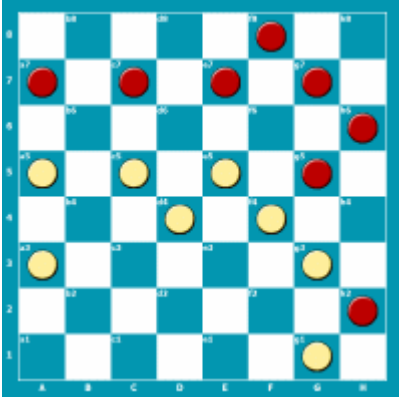

Each diagram shows column letters and row numbers on the perimeter.
Use the diagram below as a guide to quickly locate each square and move.
The moves are recorded in the "from-to" manner, for example moving a1 to b2 is recorded as a1-b2. The jumps use an x instead of a dash, like in a1xc3.
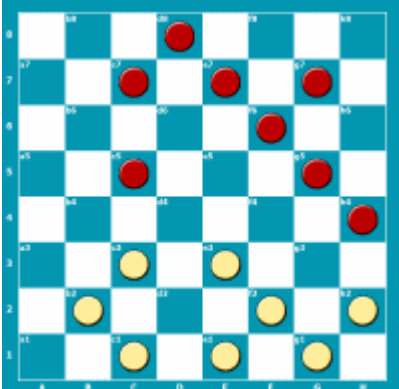

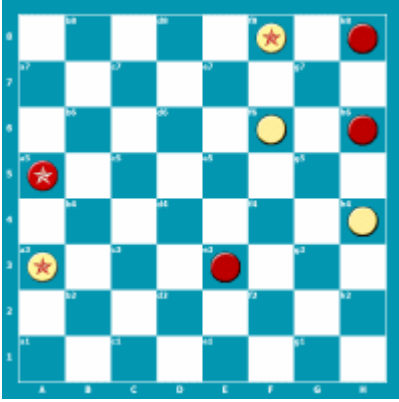

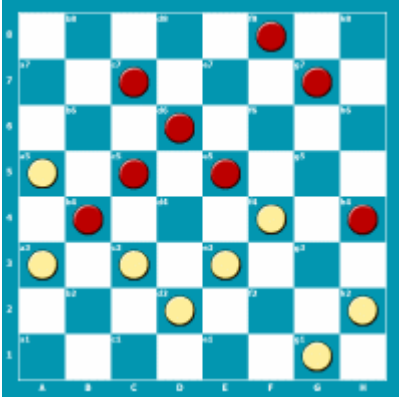

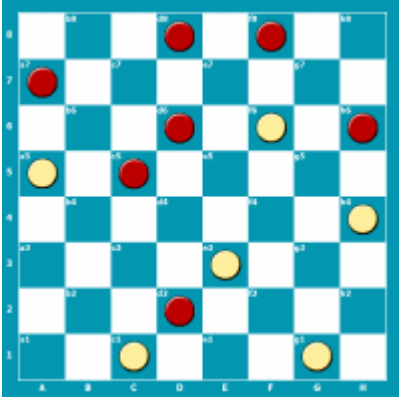

Enjoy!
