Endings

Ending is a crucial stage in the game, one can get a better opening, get the advantage during the middle game and yet not able to win at the end. The kings add a new dimension, moving in all directions able to reach across the board. In fact, ending is the hardest part of the game!

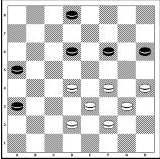

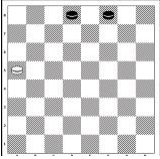

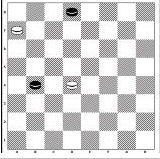

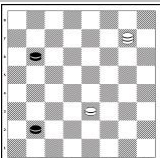

Few people understand endings, one needs a special mindset to fully comprehend it. Best players, such as Zinoviy Zirik and Boris Blinder, dedicated much of their lives to ending, creating hundreds of compositions, writing articles and books.

This book starts with a few samples, and then eases the reader into the mindset with tiny puzzles. Don't be fooled, even tiny puzzles are hard to solve. Later the complexity increases with more and more pieces. Take your time, try to solve each one, examine every move and every response. Then validate your answer to solution in the book.

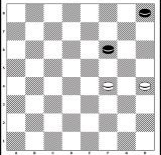

Draws are often harder to find than the wins. Defending a bad position is hard – one little mistake and it's all over! To help you concentrate on the art of defense, all draws are placed at the end of each section.

3 kings vs 1 king

3 kings vs 1 king is a special case in checkers, so much so that it is often called “The Special”.

After the stronger side gets the third king the opponent should initiate the rule and start counting his moves. If he/she counts 13 the game is a draw, even if with the next move the opponent takes the king.

1201

Petrov's Triangle is easy to remember.

The name came from the book written in 1827 by the renowned Russian chess player Alexander Petrov. He himself took it from a Spanish book written by Antonio de Torquemada in 1527.

It has three stages:

Stage 1 - take both double lines.

1.cf4 ga7 2.eg3 ab6 3.gh2 bg1 4.ah8 gc5 5.hg1 cb4

Stage 2 - while on double line take one of triple lines, this forces the opposing king to leave the other triple line.

Gonyaev' Shtick (Bayonet) is a little faster but trickier to remember.

Mikhail Gonyaev developed a different way to catch the king in 1865.

The goal is to set up the three kings in a row (in any direction), regardless where the opposing king was. The three kings are in a straight line, like a bayonet.

3 kings vs 1 king and 2 checkers

Its not too hard to win with three kings against the king and a single checker (except on h2).

Winning against the king and two checkers requires some special positions, we will look at them next.

Zadacha

There is a separate type of checker puzzles called “Zadacha”. The goal is not to win the game but to lock one or more pieces. Thus, the starting position can be quite lopsided, in this example 8 against 3.

David Kalinskiy

The book within the book

David Kalinskiy (1908-1986) was a renowned Russian checkers composer, most famous for helping rediscover the world of 3x3 endings. In this book I organized his compositions the same way as the rest of the book, in number of pieces order, with draws at the end.
