## The Book of Russian Checkers Puzzles

Book 1

by Jake Kacher  
2019

Last Update  
June 3, 2019

This 10 volume book is a collection of 500 cards (pages) with 20 puzzles per card, 10,000 puzzles all together.

Strangely enough there are no solutions given. The idea was to give pages to students to solve on their own, and then demonstrate their solutions to the teacher.

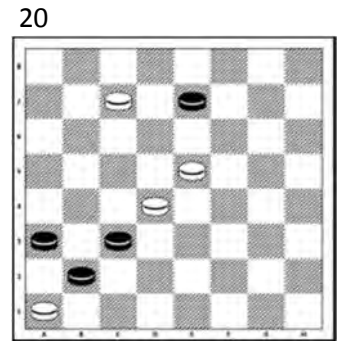

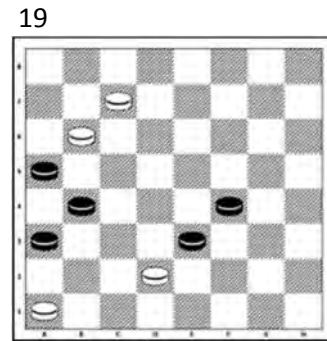

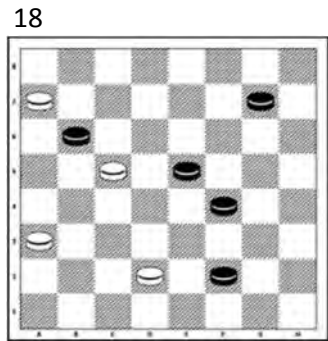

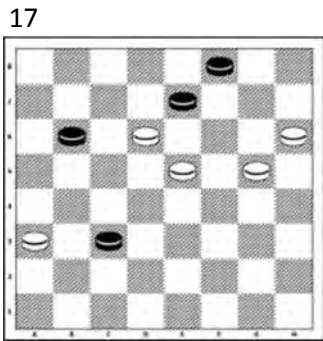

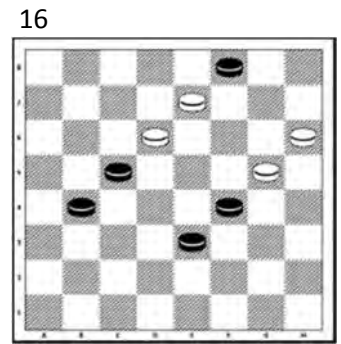

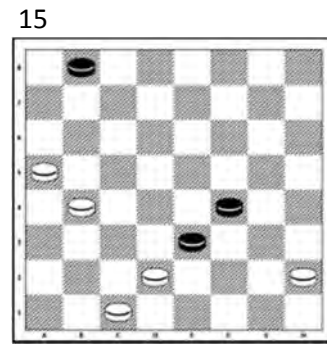

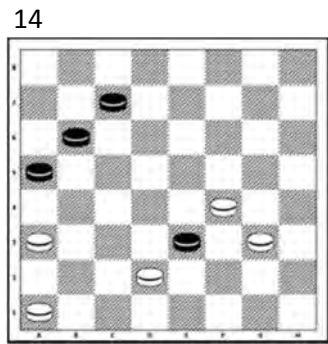

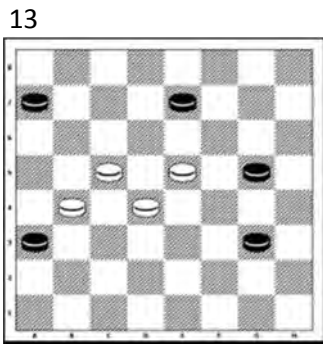

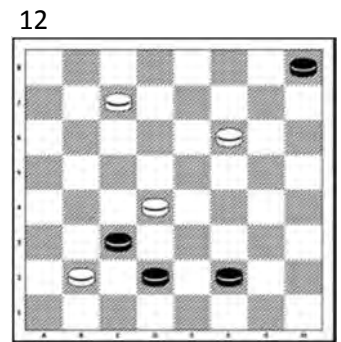

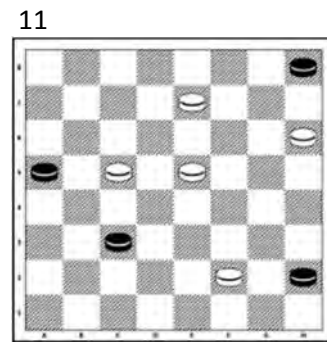

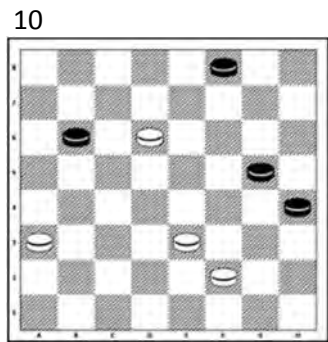

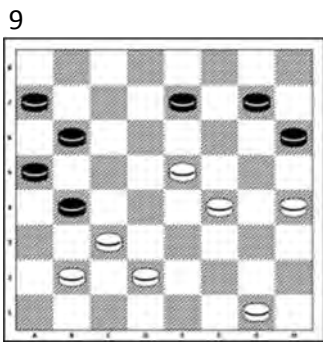

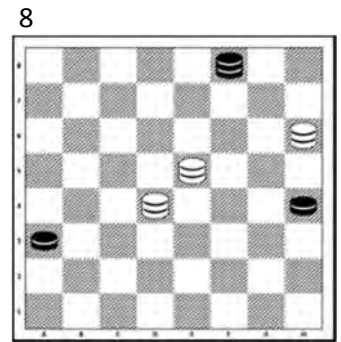

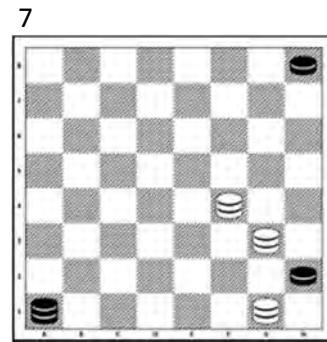

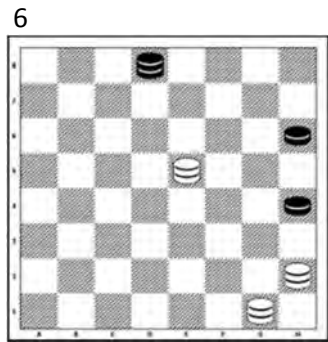

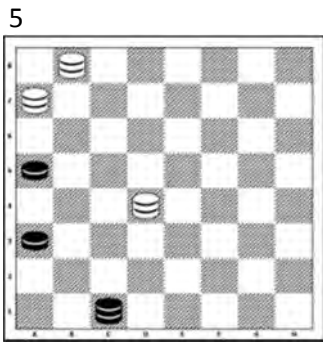

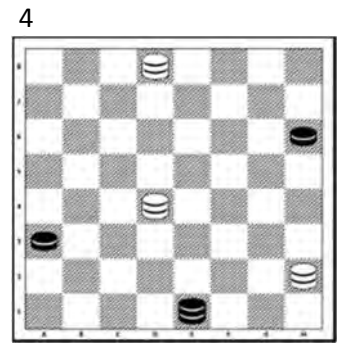

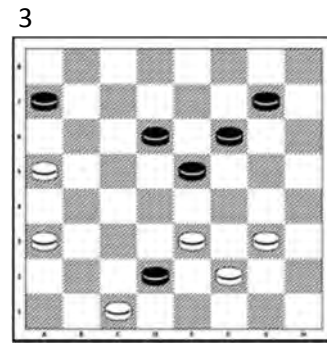

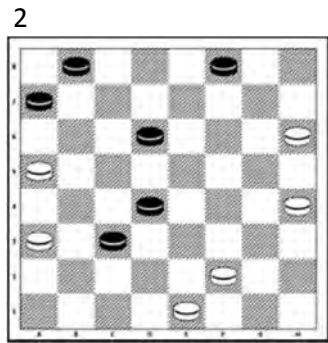

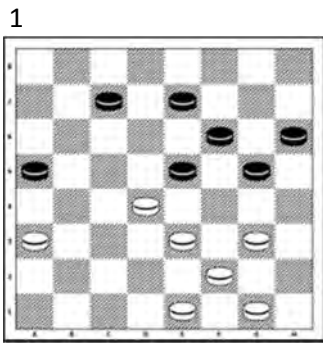

Some puzzles are easy and some are hard, you never know! Some are shots, and some are endings and others were taken from actual games.

Your task as a student is to analyze each position in depth, each position has an interesting idea, a hidden move, etc.

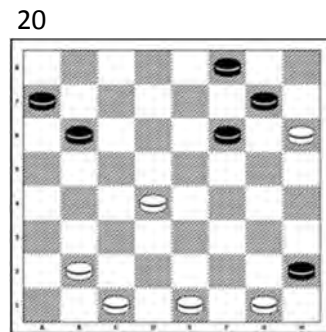

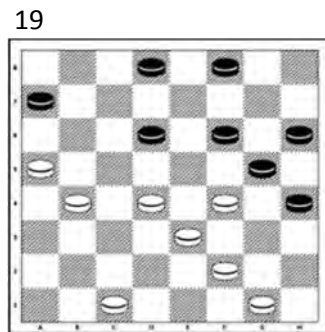

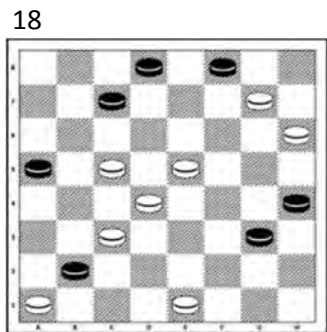

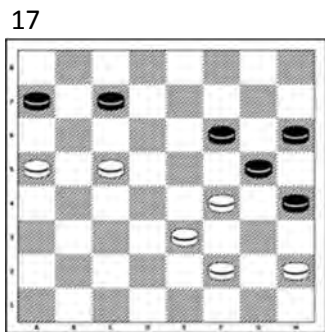

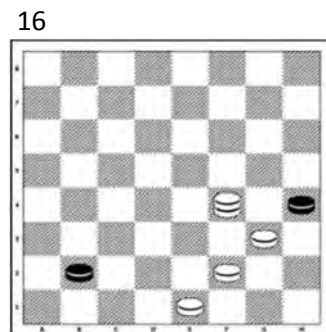

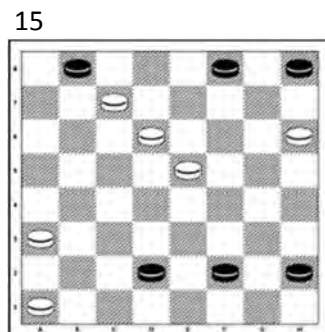

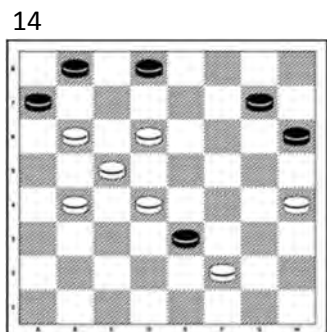

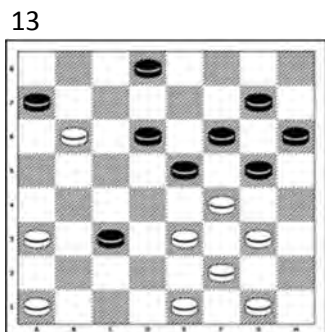

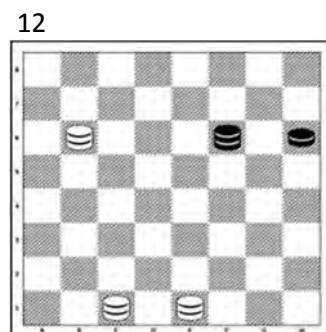

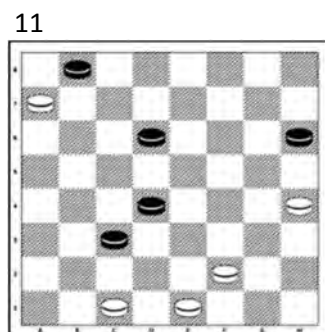

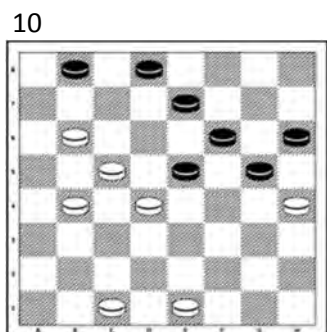

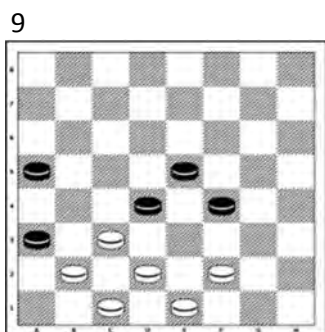

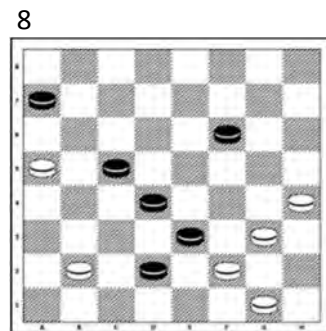

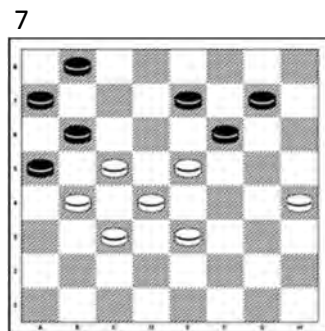

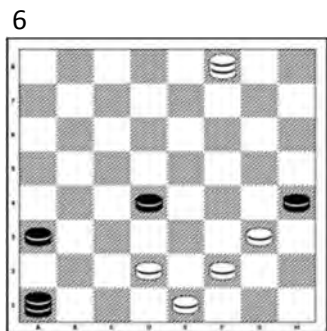

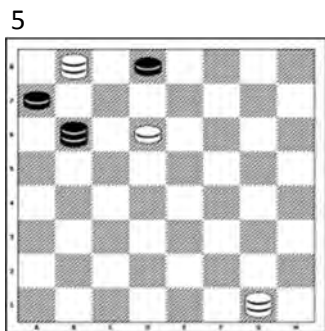

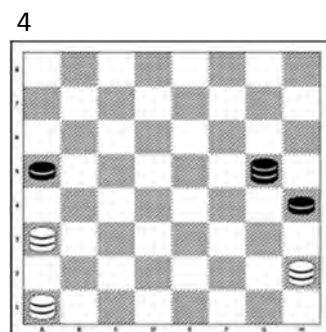

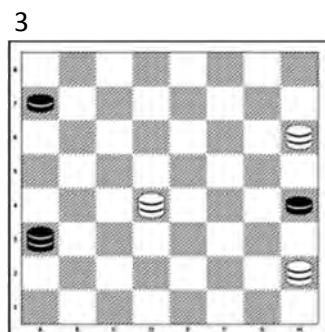

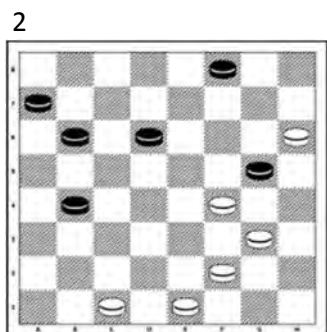

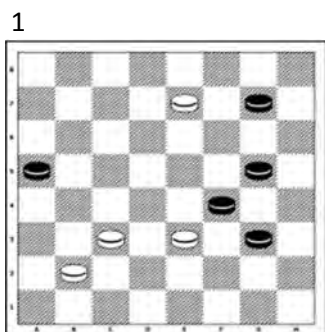

Do discuss the puzzles you can not solve, or have concerns about, ask for help, you never know, perhaps you think you solved it, but likely to miss a clever defense from your opponent.

Xerox these pages and give to your friends!
